

A world leading plant access and permit system that ...

PAS is one of the best risk minimisation investments your company can make. It is a fully integrated Permit to Work System that protects your investment in people and plant. It can also help to protect your company from duty of care breaches and possible litigation.

Protecting your investment

Designed and built to operate in complex industrial environments, the robust processes and procedures in PAS eliminate human error and significantly reduce potential for accidents and incidents. An inbuilt cross-checking feature at all key points in the process helps to anticipate and prevent dangerous conditions before they occur. PAS also captures and shares best practice intelligence to access plant items providing further safety for personnel and plant.

Reduces Company Risk

RISK REDUCTION BENEFITS

- ▶ Computer based integrated system that helps eliminate human error and reduce potential for industrial accidents
- ▶ World leading processes and procedures embodying best practice safety protocols
- ▶ Utilising the best operating practice to ensure safe access to operational plant
- ▶ Proven risk reduction benefits in some of Australia's largest industrial operations

Protection from possible litigation or duty of care breaches

PAS ensures compliance to relevant health and safety regulations and meets required and mandated safety standards, therefore reducing the risk of possible litigation and duty of care breaches. PAS provides audit records of the details of all key actions that occur within the permit process.

Quality assurance features

PAS has inbuilt Quality Assurance features to ensure that all reference information is correct and current, including Risk Assessments, Isolation Lists, Hazard Information, and Personnel Authorisation details.

Proven in large industry

PAS has a proven track record delivering demonstrable risk and cost reduction benefits across a number of industries, both in Australia and overseas. PAS has safely protected one of the largest power generation sites in Australia without any major accident or permit breaches as a result of PAS in five years.

It has repeatedly been proven in the real world that PAS can help organisations to achieve zero permit breaches, and that translates into a reduction in accidents and injury and a greatly reduced risk profile.
